Distinct Sequences

1. Claim 1-3 are drawn to a plurality of disclosed patentably distinct polynucleotides comprising materially different nucleotide sequences as evidenced by separate SEQ ID Numbers. The separate polynucleotides bear distinct structural or biochemical properties as evidenced by the separate SEQ ID Numbers 1-22. Therefore, each disclosed patentably distinct polynucleotides is considered a separate invention.

Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-22, claim(s) 1 are drawn to a plurality of disclosed patentably distinct polynucleotides (primers).

Group 23-45, claim(s) 2 are drawn to kits containing a plurality of disclosed patentably distinct polynucleotides.

Group 46-67, claim(s) 3 are drawn to a method of detecting presence or absence of E.coli in sample.

3. The inventions listed as Groups 1-67 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature-linking groups 1-67 appears to a method of detecting presence or absence of E.coli in sample. However, Pass et al. (Journal of Clinical Microbiology vol.38, no. 5, pp. 2001-2004, May 2000) teach multiplex PCR methods for detection of E.coli (see abstract). Therefore, the technical feature linking the inventions of groups 1-67 does not constitute a special technical feature as defined by the PCT Rule 13.2, as it does not define a contribution over the prior art. As set forth above, each of group I-III has a special technical feature that is not required for the other groups.

4. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
